Anarcy Arcade is a shortcut launcher, just like your regular desktop. **It replaces your 2D wallpaper image with a 3D world, and replaces your 2D shortcut icons with 3D objects.**

It transforms our PCs into 3D metaverses that we can explore with our friends while still getting work done. Performance is always put first. It will not lag your games down.

Use AArcade as your everyday desktop, or use it to manage your massive game, movie, or image collection and share with your friends.

English

I just tried the new version, and I didn't have to do anything now! I had lots of fun decorating my arcade with my own Steam games and emulators. It's really fun, and I wish I actually got into the game before writing my past review.. CRAP CRAP CRAP THIS IS PURE BS DON'T WASTE 4GB AND 46 MIN OF YOUR DEGEN LIFES LIKE ME PLISS DON'T EVWEN BOTHER WITH THIS PURE\u2665\u2665\u2665\u2665\u2665. This game sucks if you download it you have a disability.. needs alot of work but i think it will eventually be good if they keep woking on it.. No updates, ugly looking, bad UI. I get that it's free but still not much of a point to it.. Populate your favorite maps with your favorites things.

There's also a new YouTube panel in your Settings menu with various ways that you can customize your in-game YouTube experience.

YouTube Playlists Behavior. **Attract Camera - Client Update 12/6/2018:**

Hello everyone! Today's update includes something called Attract Camera. Press E to select a cabinet, such as a video tablet, and the camera will go into attract camera mode and be animated.

You can use the new `select_next` and `select_prev` console commands to cycle between games without leaving attract camera mode.

Only about half of the cabinets support attract camera mode right now, but the rest will soon have support added for them as well.

Party on! 🙌

Change Log. Screenshot Portals & Framework Upgrades - Client Update 1/31/2019:

Greetings. Today's update improves the ability to spawn screenshots as teleports to other worlds, or to jump around within the same world. So be sure to hit F5 and take lots of pictures if you want to warp around to them!

I gave AArcade's internal embedded framework systems an overhaul, greatly improving its performance in many scenarios. You'll also notice on-screen video stats when in developer mode now.

Some other note worthy improvements are key stroke repeating and responsive mouse cursors, as well as an improved Tab & Favorites menu.

Party on!
